📄 PROFILE SUMMARY

Full-stack and mobile app developer specializing in the MERN stack (MongoDB, Express.js, React, Node.js), Next.js, and Flutter. Trained through the Qiyas Web and Enterprise Application Development program, complemented by self-directed learning. Built 10+ real-world projects including e-commerce platforms, payment integrations, and management systems. Currently leveling up into NestJS and TypeScript. Passionate about building clean, scalable web and mobile apps and exploring the path to launching a personal SaaS product.

🧠 TECHNICAL SKILLS

Frontend

Next.js, React, Tailwind CSS, Material UI, JavaScript (ES6+), HTML, CSS

Backend

Node.js, Express.js, REST APIs, JWT

Database

MongoDB, Mongoose, PostgreSQL

Mobile

Flutter, Dart, GetX

Integrations

Stripe Payment Gateway, Chapa Payment Gateway, Axios

Tools

Git, GitHub, Vercel, Render, Postman

🌐 LANGUAGES

English

Fluent

Amharic

Fluent

🎓 EDUCATION

Comprehensive training in full-stack web and mobile development

Qiyas Web and Enterprise Application Development

Self-Learner

Continuous learning through building real-world projects

📁 PROJECTS

Merkato Store — Pan-African & Middle East E-Commerce Platform

Tech: Next.js 16, Express.js, MongoDB, Tailwind CSS, Stripe, JWT

- Built a full-stack e-commerce platform with product catalog, cart, checkout, and order management
- Implemented secure JWT authentication with role-based access for customers and admins
- Integrated Stripe payment gateway for secure online payments
- Designed MongoDB schemas for products, orders, users, and reviews
- Multi-region support (6 African & Middle East countries) with dynamic currency display
- Admin dashboard with product CRUD and order management

Personal Portfolio Website — Next.js

Tech: Next.js, React, Tailwind CSS, Framer Motion, Lucide React

- Developed a responsive single-page portfolio to highlight projects and technical skills, using a clean, light-mode design for optimal readability
- Leveraged the Next.js App Router to improve page performance and implemented metadata for better SEO
- Integrated Framer Motion to create smooth, section-based reveal animations that enhance user experience
- Structured the layout into clear sections for projects, skills, problem-solution examples, and a contact area — fully optimized for mobile devices
- Live Demo: <https://nigus-solomon.vercel.app>
- GitHub: <https://github.com/Nigus-Solomon-Dev/portfolio>

🧩 CURRENT FOCUS

- Leveling up into NestJS and TypeScript
- Exploring the path to building and launching a personal SaaS product
